✂ SKILLS

Language

- C# – Expert
- SQL – Expert
- HTML – Proficient
- JavaScript – Proficient
- CSS – Proficient
- Batch – Competent
- Python – Competent
- Java – Competent
- PHP – Competent

Framework

- .NET/.NET Core – Expert
- JQuery – Proficient
- Bootstrap – Proficient
- Unity – Competent

Cloud – Proficient

- AWS
- DigitalOcean

Containerization – Proficient

- Docker

Operating System

- Windows – Expert
- Linux – Proficient

Version Control – Expert

- Git

Collaborative – Proficient

- Jira
- Confluence
- Trello

📁 PROFESSIONAL EXPERIENCE

Chapter Lead, Chief Software Engineer, *Danske Bank, Asset Management*

2023 – present

- Responsible for both technical leadership and HR-related aspects (2+ years), including recruitment and onboarding of top-tier talent.
- Spearheaded the decentralization of the Asset Management tribe, successfully leading multiple large-scale projects concurrently.
- Acted as the binding between architects and developers, translating vision into actionable architecture.
- Head of the .NET/C# domain; responsible for tech strategy, quality standards, and long-term maintainability.
- Led the migration of legacy systems to modern, scalable, and robust technology stacks.
- Delivered numerous cloud-native microservices, emphasizing performance, scalability, and clean architecture.
- Hands-on in developing high-quality, low-maintenance code with a strong focus on engineering excellence.
- Provided architectural guidance and technical mentorship to a team consisting of 10+ engineers.
- Drove initiatives to maintain a high standard of application quality and infrastructure independence.
- Actively contributed to both low-level and high-level documentation.
- Regularly showcased new features and product updates to audiences of up to 70+ people, ensuring transparency and alignment.
- Built a supportive team environment by teaching, guiding, and leading by example—helping others grow, learn, and work better together.

Senior Software Engineer, Cloud Specialist, *Danske Bank, Asset Management*

2021 – 2023

- Key person in decentralizing the tribe and front-running multiple big projects at once, as well as interviewing and taking responsibility for getting the best candidates onboarded.
- Head of the .NET area.
- Moved legacy tech stacks to newer and more robust tech stacks.
- Active contributor towards documenting both low-level designs as well as on a high level.
- Pushed out tons of deliveries as microservices (cloud-native applications).
- Led and taught other developers architecture and the vision for where we're heading.
- The binding between the architects and the developers.

EDUCATION

Bachelors

Roskilde Universitet, Computer Science and Informatics

2016 - 2020

Secondary School, Mathematics and Information Technology

H.C. Ørsted Gymnasium, Frederiksberg

2013 - 2016

Primary School

Søndervangskolen, Glostrup

2003 - 2013

- Built solid infrastructure totally separated from everything else.
- Maintained a high standard on applications.
- Actively showcased new features and functionalities for more than 70+ people.

Cloud Specialist, Danske Bank, Asset Management

2021 - 2021

- Created a solid foundation in modern development for years to come.
- Actively participated in helping other tribes perform better.
- Pushed out tons of deliveries as microservices (cloud-native applications).

Associate Software Engineer, Danske Bank, Markets Post Trade Services

2019 - 2021

- Created a solid foundation in modern development for years to come.
- Participated in clubs to improve skills and retrospectiveness.
- Built applications that flow multiple millions through each day.
- Built Razor Pages.

Student Software Engineer, Danske Bank, Markets Post Trade Services

2018 - 2019

- Agile development.
- Worked with Docker orchestration.
- Built supportive applications for business users.
- Learned about the business as a whole.

Webmaster, Freelance, Kongebørn

2017 - 2018

- Created a stable CMS.
- Updated and maintained plugins.
- CSS development on the stylesheet.
- Worked physically in the store and helped where needed.
