- Git

🎓 EDUCATION

Bachelors, *Roskilde Universitet, Computer Science and Informatics*
2016 – 2020 | Denmark

💼 PROFESSIONAL EXPERIENCE

Chapter Lead, Chief Software Engineer, *Danske Bank*
2018 – present
- Responsible for both technical leadership and HR-related aspects (2+ years), including recruitment and onboarding of top-tier talent.
- Spearheaded the decentralization of the Asset Management tribe, successfully leading multiple large-scale projects concurrently.
- Binding between architects and developers, translating vision into actionable architecture.
- Head of the .NET/C# domain; responsible for tech strategy, quality standards, and long-term maintainability.
- Led the migration of legacy systems to modern, scalable, and robust technology stacks.
- Delivered numerous cloud-native microservices, emphasizing performance, scalability, and clean architecture.
- Hands-on in developing high-quality, low-maintenance code with a strong focus on engineering excellence.
- Provided architectural guidance and technical mentorship to a team consistent of 10+ engineers.
- Drive initiatives to maintain a high standard of application quality and infrastructure independence.
- Actively contributed to both low-level and high-level documentation.
- Regularly showcased new features and product updates to audiences of up to 70+ people, ensuring transparency and alignment.
- Built a supportive team environment by teaching, guiding, and leading by example—helping others grow, learn, and work better together.

Webmaster, *Kongebørn*
2017 – 2018
- Developed and maintained a stable and reliable CMS platform
- Managed and updated website plugins to ensure optimal performance
- Performed front-end and back-end development using PHP and CSS
- Provided on-site support in the store, assisting with various tasks as needed
